

CHAPIN

.....
MANUFACTURING EXCELLENCE SINCE 1884

PRESS RELEASE

BATAVIA, NEW YORK - Chapin Manufacturing, Inc. announced that Chapin Custom Molding Inc., a newly incorporated subsidiary of Chapin Manufacturing, Inc., executed an Asset Purchase Agreement on June 29, 2018 to acquire certain operating assets of Quality Blow Molding, Inc. of Elyria, Ohio. Chapin Custom Molding will use the assets acquired from Quality Blow Molding, along with additional investment and equipment, to provide new products and capabilities to Chapin's customers.

Jim Campbell, President and CEO of Chapin Manufacturing said, "We are excited about our new venture and look forward to expanding our product lines. Chapin has been blow molding high quality pressure vessels and non-pressure tanks and bottles for decades and is an expert in the blow molding field. Chapin will continue to provide its customers with exceptional service and high quality products either directly or through its new subsidiary".

ABOUT CHAPIN

With roots dating back to 1884, Chapin has been a world leader in compressed air sprayers since it patented the first U.S. pump sprayer in 1902. This world-class group of companies will now be able to offer its exacting manufacturing and progressive technology and design methods to customers seeking the same quality, delivery and value offered by Chapin products.

Over the years, Chapin has branched out into several different consumer goods areas. Chapin has a full line of turf and salt spreaders that are produced at its Clarence, New York facility. The materials used to make these products consist of plastic, steel and stainless steel, and are high quality products for the higher end market.

Chapin's Heath Manufacturing Company ("Heath") has an additional facility in Coopersville, Michigan, located just outside Grand Rapids, which is home to Chapin's Heath Outdoor Products business. Heath manufactures and sells bird feeders, bird houses, suet cakes, lawn and garden products, planters and ancillary related products, including seed scoops, squirrel feeders, baffles and American flags to retailers and distributors serving the home, lawn and garden markets across the United States and abroad.

Chapin also operates two wholly-owned overseas subsidiaries, including one in Ningbo, China, which enable Chapin to economically produce and purchase products and tooling.

In all of these businesses, Chapin leverages its core competencies in manufacturing to enter and quickly become a leader in other product areas.
