

PRESS RELEASE

ELYRIA, OHIO – Chapin Custom Molding has expanded its warehouse capacity and operations in January, 2019, with a lease agreement for additional facilities near the company’s main plant in Elyria, Ohio. The new warehouse encompasses 55,000 square feet, providing increased storage and assembly space. The new location offers two loading docks that accommodate trucks up to 53 feet in length, and two overhead doors for receiving and sending shipments.

“The new warehouse increases what we can offer to our customers in terms of warehousing, storage and shipments” said Brian Evertt, Operations Manager at Chapin Custom Molding.

“Customers can order products in advance, use it as an assembly point, and store finished parts for future shipments.”

Chapin Custom Molding offers extrusion blow molding capabilities at its main production plant in Elyria. The company’s main office can be contacted at 440-458-6550 or www.chapincustommolding.com.

Chapin Custom Molding is a division of Chapin International, a leading manufacturer of compressed air sprayers, and turf and salt spreaders in Batavia, New York.
