

PRESS RELEASE

ELYRIA, Ohio – Chapin Custom Molding has expanded its capabilities by adding a new Silo earlier this year. This silo is 37.3 feet tall, and moves 250,000 pounds of additional resin throughout its main facility. Brian Evertt, operations manager at Chapin Custom Molding states the following:

“We’ve expanded our internal material handling system so we could service an additional 8 machines with material directly from the silo and added 3 surge bins to hold material within the plant.”

Production keeps moving forward at the plant with its recent addition. Chapin Custom Molding offers extrusion blow molding capabilities at its main production plant in Elyria, Ohio. The main office can be contacted at 440-458-6550 or www.chapincustommolding.com.

Chapin Custom Molding is a division of Chapin International Inc., a leading manufacturer of compressed air sprayers, and broadcast spreaders for salt and turf applications in Batavia, New York.
